2.6.2 Attainment of programme outcomes and course outcomes are evaluated by the institution.

BITS-Vizag is affiliated to ***JAWAHARLAL NEHRU TECHNICAL UNIVERSITY, KAKINADA***. The College offers Under Graduate as well as Post Graduate programs and courses under the Faculty of **Business Administration**, **Science and Technology**. For these programs and courses, the institute followed the curriculum designed by our affiliated university. The Programme outcomes, Programme specific outcomes and course outcomes are evaluated by the institution and the same are communicated to the students in the formal way of the discussion in the classroom and departmental notice board. After measuring attainment of POs, PSOs and COs, it has been observed that the strength of the students as well as passing percentage of the students is increasing progressively. Besides, students' progression to the higher studies that is from Under Graduate to Post Graduate seems to be increasing consistently and rapidly in the last five years. In a similar way, the ratio of students' placement is also increasing. We took utmost care of measuring the level of attainment of POs, PSOs and COs and followed formal as well as informal mechanism for the measurement of attainment of the outcomes. Even we took feedback from all the stakeholders in this respect and try to take necessary steps accordingly. Subsequently, the College took care of the attainment to measure the POs, PSOs and COs and implemented the mechanism as follows:-

1. ***The institute follows the Academic Calendar of our affiliated university.***
2. ***All the subject teachers maintain Academic Diary in every academic year.***
3. ***All the subject teachers prepare Semester-Wise evaluation Reports.***
4. ***Internal examination committee analyzes evaluation reports of results.***
5. ***Institute considers Feedback from the Stakeholders for the attainment of PO, PSO and CO.***
6. ***Placement committee took the review of the Students' Progression to Higher Studies and their Placement.***

The faculty members do mapping between COs, POs as well as in between COs and PSOs. In the mapping matrix, 3, 2, 1 or 0 shall be considered where **3 indicates highly mapped**, **2 indicates moderately mapped**, **1 indicates low mapped** and **0 indicates no mapping**.

Course Outcome attainment in our institution is done in two different manners:

a) <u>Direct attainment:</u> Direct attainment concentrates on internal exam performance of the students and indirect attainment concentrates on external exam performance of the students. 70% weightage is given to external exams and 30 % weightage is given to internal exams.

b) <u>Indirect attainment:</u> In direct attainment, Questions related to COs are tabulated and then attainment is calculated. In Indirect attainment, as we are not aware of the students about the things such as whether to attend that question or not. At that time, pass percentage of that subject is considered. The Target levels set for Internal and External examinations is as

follows. This Target Levels decision has been taken by Department Advisory Committee (DAC).

The level of the target is mapped in the following manner:

1. ***If percentage of attainment is in between 70 % to 100%, the target level is set as 3.***
2. ***If percentage of attainment is in between* 60 to 70%, the *target level is set as* 2.**
3. ***If percentage of attainment is in between* 50 to 60 %, *the target level is set as* 1.**
4. ***If percentage of attainment is* less than 50% *the target level is set as 0.***

For better understanding of the target level concept, let's consider an example.

Let's assume, Attainment through University Examination is 3 whereas attainment through Internal Assessment is moderate and its 2. At the same time, let's assuming that 70% weightages given to the university examination and 30% weightage given to internal assessment. From the attainment calculator the actual target level is calculated using following calculation mechanism.

(70% of university level) + (30% of internal level)

⇩

(70% of 3) + (30% of 2)

⇩

2.1 + 0.6= 2.7

According to the above calculation the attainment target level is found to be 2.7 which is equivalent to 3 and hence it comes under HIGHLY MAPPED.

Mechanism for attaining PO's is as follow:

1. In Direct Attainment, the average of mapping of all courses related to POs is considered.
2. In Indirect attainment, faculty feedback is considered as a tool. If Course Feed Back percentage is **75%,** then it is converted in to equivalent attainment value with base value 3 i.e

(75/100) *3 = 2.25

Depends on the above set Criteria, the Weighted Averages of CO-PO mapping table is replaced with the corresponding indirect attainment value.
