### DEPARTMENT OF MANAGEMENT STUDIES

## SUMMARY REPORT OF DIGITAL MARKETING COURSE ALONG WITH OUTCOMES:

Any marketing that uses electronic devices and can be used by marketing specialists to convey promotional messaging and measure its impact through your customer journey.

In practice, digital marketing typically refers to marketing campaigns that appear on a computer, phone, tablet, or other device. It can take many forms, including online video, display ads, search engine marketing, paid social ads and social media posts. Digital marketing is often compared to "traditional marketing" such as magazine ads, billboards, and direct mail. Oddly, television is usually lumped in with traditional marketing.

Digital marketing works for B2B as well as B2C companies, but best practices differ significantly between the 2

- B2B clients tend to have longer decision-making processes, and thus longer sales funnels. Relationship-building strategies work better for these clients, whereas B2C customers tend to respond better to short-term offers and messages.
- B2B transactions are usually based on logic and evidence, which is what skilled B2B digital marketers present. B2C content is more likely to be emotionally-based, focusing on making the customer feel good about a purchase.
- B2B decisions tend to need more than 1 person's input. The marketing materials that best drive these decisions tend to be shareable and downloadable. B2C customers, on the other hand, favor one-on-one connections with a brand.

Of course, there are exceptions to every rule. A B2C company with a high-ticket product, such as a car or computer, might offer more informative and serious content. Your strategy always needs to be geared toward your own customer base, whether you're B2B or B2C.

Search engine optimization, or SEO, is technically a marketing tool rather than a form of marketing in itself. The Balance defines it as "the art and science of making web pages attractive to search engines."

The "art and science" part of SEO is what's most important. SEO is a science because it requires you to research and weigh different contributing factors to achieve the highest possible ranking. Today, the most important elements to consider when optimizing a web page include:

- Quality of content
- Level of user engagement
- Mobile-friendliness
- Number and quality of inbound links

SEO is a major factor in content marketing, a strategy based on the distribution of relevant and valuable content to a target audience.

Content marketing matters, and there are plenty of stats to prove it:

- 84% of consumers expect companies to produce entertaining and helpful content experiences
- 62% of companies that have at least 5,000 employees produce content daily
- 92% of marketers believe that their company values content as an important asset

Social media marketing means driving traffic and brand awareness by engaging people in discussion online. The most popular platforms for social media marketing are Facebook, Twitter, and Instagram, with LinkedIn and YouTube not far behind.

Affiliate marketing lets someone make money by promoting another person's business. You could be either the promoter or the business who works with the promoter, but the process is the same in either case.

- Learning Outcome 1: Principles of Digital Marketing and the Marketing Mix.
- Learning Outcome 3: Digital Marketing Tools.
- Learning Outcome 2: Search Marketing.
- Learning Outcome 5: Social Media and Online PR.
- Learning Outcome 5: Email, Advertising and Viral Marketing.
- Reporting and Web Analytics.

Sub: -Approval for conducting a Value added course on Non Destructive Testing -reg

This is to bring to your kind notice that the Department of Mechanical Engineering is planning to conduct a "One week value added course on NDT" from 17<sup>th</sup> to 22<sup>nd</sup> February 2020, which will provide students a practical perspective on the world of work. It provides students with an opportunity to learn practically through interaction, working methods and employment practices.

Hence we request you to accept our approval for conducting an event.

Forwarded for Approval.

## **ADD-ON COURSE ON NON-DESTRUCTIVE TESTING**

**Date: 17<sup>th</sup> – 22<sup>nd</sup> February, 2020**

### **PROGRAMME OBJECTIVES**

Non destructive testing method is used in identifying defects in the materials. It is the advanced method of testing of materials with a bias toward how to apply these techniques in order to reap the most reward from its implementation which will provide students a practical perspective on the world of work. It provides students with an opportunity to learn practically through interaction, working methods and employment practices.

- Understand the meaning and importance of **NON DESTRUCTIVE TESTING**.
- Get a basic knowledge of different non destructive testing methods.
- Learn how to test complex materials and make better, faster analysis.
- Identify how and where it would be used.
- Students able to learn different testing procedures and apply in real time applications.

- Student able to use the Testing equipment in real life experiments.

## **DAY 2: Technical Session**

### **Objectives:**

- Discuss in detail about **NON DESTRUCTIVE TESTING**, Applications in various fields.
- Students will understand and hands on experience on different non destructive testing methods.

### **Outcomes:**

- Student gain the knowledge about the Magnetic particle testing and Radiographic testing which are used in identifying defects in the materials and its applications in various fields.
- Student can able to understand the Testing procedures and Functions of equipment.

- Student able to use the Testing equipment in real life experiments.

### **DAY 3: Technical Session**

#### **Objectives:**

- Understanding the advantages and disadvantages of NDT techniques
- Basic principles of these NDT methods

#### **Outcomes:**

- Students are able to understand the advantages and disadvantages of NDT techniques and principles of these NDT methods

### **DAY 4: Technical Session**

#### **Objectives:**

- Understanding the Eddy Current Testing and industrial applications of NDE

#### **Outcomes:**

- Students are able to understand the Eddy Current Testing

### **DAY 5: Technical Session**

#### **Objectives:**

- Understanding the infrared and thermal testing
- Valedictory Program will be held for the respective dignitaries.

#### **Outcomes:**

- Students are able to Understand the infrared and thermal testing

### **DAY 6: Technical Session**

#### **Objectives:**

- Interaction session with students
- Valedictory Program will be held for the respective dignitaries.

---

#### **Program outcomes of an Event:**

- Non destructive testing procedures.
- Practical session on various non destructive testing equipments.
- Usage of Equipment for testing materials
- Major outcome is students are able to perform real time testing on various materials for identifying defects using NDT equipments in the industry because of the hands on practical sessions. This value added course will helps students to get the jobs in future.

**About the Course**

Internet of Things (IoT) is a new revolution of the Internet. It is a network of physical devices, vehicles, home appliances, and other items embedded with electronics, software, sensors, actuators, and network connectivity which is linked to a system over environment. It allows objects to be sensed and connected remotely across existing network infrastructure. Also, it is creating opportunities for more innovation in the physical world, like computer based systems, which provides improved efficiency and operations.

One of the key learning platforms for IoT is the Raspberry Pi. The RPi3 is a popular platform because it offers a complete Linux system in a tiny price. Also, it is easy to use. In fact, one of the most difficult parts of using Raspberry Pi is knowing where to start. This workshop will give the platform to understand and use Raspberry Pi for IoT applications.

**ABOUT THE DEPARTMENT:**

The Department of Electronics and Communication Engineering offers a four-year undergraduate program with an intake of 60 students. It is a well-equipped department with modern facilities, with various research oriented facilities, which aims to meet the curriculum requirement of not only the nation's industry but also the other Universities across the globe. The department also provides the widest range of facilities to the students to the highest standards, which is the top notch education around the globe.

### Objective of an Event:

- Understand the definition and significance of the Internet of Things.
- Discuss the architecture, operation, and business benefits of an IoT solution.
- Examine the potential business opportunities that IoT can uncover.
- Explore the relationship between IoT, cloud computing, and big data.
- Identify how IoT differs from traditional data collection systems.
- Students will be explored to the interconnection and integration of the physical world and the cyber space. They are also able to design & develop IOT Devices.

### Description of the Event:

The Internet of Things (IoT) is everywhere. It provides advanced data collection, connectivity, and analysis of information collected by computers everywhere taking the concepts of Machine-to-Machine communication farther than ever before. This course gives a foundation in the Internet of Things, including the components, tools, and analysis by teaching the concepts behind the IoT and a look at real-world solutions.

## DAY-1: Inaugural and Technical Session

### Objectives:

- Inaugural function held by the respective Dignitaries.
- Discuss an overview of IOT Architecture Design, Applications in home automation and various fields.
- Identify the Types of Development Boards, Applications of each development board and discuss the Introduction to Node MCU
- Students will understand and learn Concepts of BLYNK App and IFTTT

**PRINCIPAL**  
 Baba Institute of Technology and Sciences  
 Bakkannapalem (V), Madhurawada (P)  
 Visakhapatnam

#### Outcomes:

- Student gain the knowledge about the overview of IOT Architecture Design, Applications in home automation and various fields.
- Student can able to identify the Types of Development Boards, Applications of each development board and Node MCU
- Student able to use the BLYNK App and IFTTT

#### DAY-2: Technical Session

##### Objectives:

- Discuss the topics of IoT enabling technologies and systematic integration such as sensor technologies, big sensor data management, and future Internet design for IoT
- Explore the Introduction to Arduino, Arduino IDE details and how to use the Arduino board.
- Student will learn how to write Code in Arduino.
- Student will gain the practical knowledge about Arduino by the end of the Session.

  
**PRINCIPAL**

#### Outcomes:

- Student gain the knowledge about IoT enabling technologies and systematic integration such as sensor technologies, big sensor data management, and future Internet design for IoT
- Student learn about Arduino, Arduino IDE details and how to use the Arduino board.
- Student learn how to write Code in Arduino.
- Student gain the practical knowledge about Arduino by the end of the Session.

#### DAY-3: Technical Session

##### Objectives:

- Discuss the topics of Real Time Applications of IOT and Upgraded technologies in IOT
- Explore the concept of Tinker CAD, Circuit design in TinkerCAD
- Student will learn how to write Code in TinkerCAD.
- Student will gain the practical knowledge about TinkerCAD by the end of the Session.

#### Outcomes:

- Student gain the knowledge about the topics of Real Time Applications of IOT and Upgraded technologies in IOT
- Student learn about the concept of Tinker CAD and know how to design Circuit in TinkerCAD
- Student learn how to write Code in TinkerCAD.
- Student gain the practical knowledge about TinkerCAD by the end of the Session.

#### DAY-4: Technical Session

##### Objectives:

- Discuss the topics of IOT using Python Programming Language with Raspberry pi
- Explore the Looping Structures in Raspberry pi
- Student will learn how to write Code in Raspberry pi
- Student will gain the practical knowledge about Raspberry pi by the end of the Session.

---

##### Outcomes:

- Student gain the knowledge about the topics of IOT using Python Programming Language with Raspberry pi
- Student learn about the Looping Structures in Raspberry pi
- Student learn how to write Code in Raspberry pi
- Student gain the practical knowledge about Raspberry pi by the end of the Session.

#### DAY-5: Technical Session

##### Objectives:

- Student will know the importance of team building and the several strategies for focusing on Career
- Student will know how to Implement Real Time Projects using Raspberry Pi and Arduino
- Student will be able to do Real Time Projects by the end of this Session

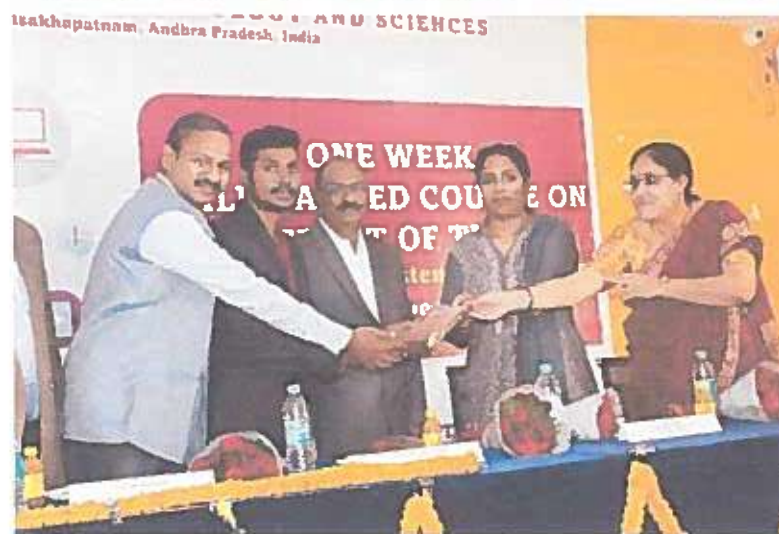

**PRINCIPAL**  
Baba Institute of Technology and Sciences  
Bakkannapalem (V), Madhurawada (P)

#### Outcomes:

- Student learn the importance of team building and the several strategies for focusing on Career
- Student gain the knowledge about how to Implement Real Time Projects using Raspberry Pi and Arduino
- Student can able to do Real Time Projects by the end of this Session
- Valedictory Program had held for the respective dignitaries.

#### Outcomes of an Event:

- Connecting sensors and actuators to IoT framework
- Receiving sensory information from devices

**PRINCIPAL**  
**Gogo Institute of Technology and Sciences**  
**Bakkannapalem (V), Madhurawada (P)**  
**Visakhapatnam**

- Connecting IoT devices to a local cloud
- Sending command from remote systems to IoT devices
- Major outcome is students are able to work as a 'IOT programmer' in the industry because of the hands on practical sessions. This job oriented course will helps students to get the jobs in future.

**ADDON COURSE ON IOT ARCHITECTURE AND SYSTEM LEVEL DESIGN**

**ORGANISED BY**

**DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING**

**COURSE OBJECTIVES:**

1. Discuss the architecture, operation and business of an IOT solution.
2. Examine the potential business opportunities that IOT can uncover
3. Explore the relationship between IOT, cloud computing and big data.
4. Identify how IOT differs from traditional data collection systems

**COURSE OUTCOMES:**

1. Identify the components that forms part of IOT architecture.
2. Determine the most appropriate IOT devices and sensors based on case studies
3. Setup the connection between the devices and sensors.
4. Evaluate the appropriate protocol for communication between IOT.
5. Analyze the communication protocols for IOT.

## **OUTCOMES OF “DIGITAL PRODUCTS AND COMMERCIALIZATION OF BUSINESS MODELS:**

In the era of digitalization, manufacturing firms find it difficult to assess what is “the right” digital business model. To avoid common digitalization traps, company leaders and managers need to carefully assess each business model opportunity before committing to implementation and commercialization.

These Sessions insights the students about the case study and the diverse and complex issues related to digital business models. It high light three digitalization traps and provide a three-phase framework companies can use to evaluate digital business model opportunities and make an informed decision on the commercial prospects for each model vetted.

Business models are fundamentally linked with technological innovation, yet the business model construct is essentially separable from technology. It will define the business model as a system that solves the problem of identifying who is (or are) the customer(s), engaging with their needs, delivering satisfaction, and monetizing the value.

This Session explain the students about the framework and depicts the business model system as a model containing cause and effect relationships, and it provides a basis for classification. It will formulate the business model relationship with technology in a two-way manner.

First, business models mediate the link between technology and firm performance. Secondly, developing the right technology is a matter of a business model decision regarding openness and user engagement. This session suggest research questions both for technology management and innovation, as well as strategy.

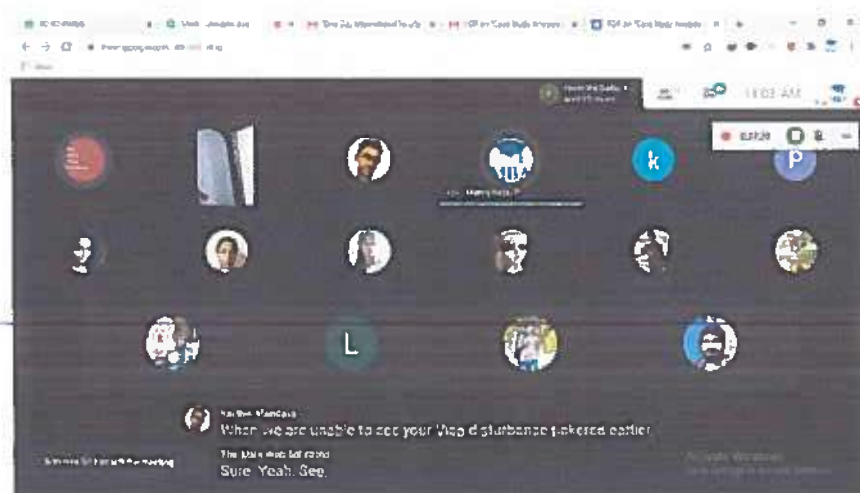

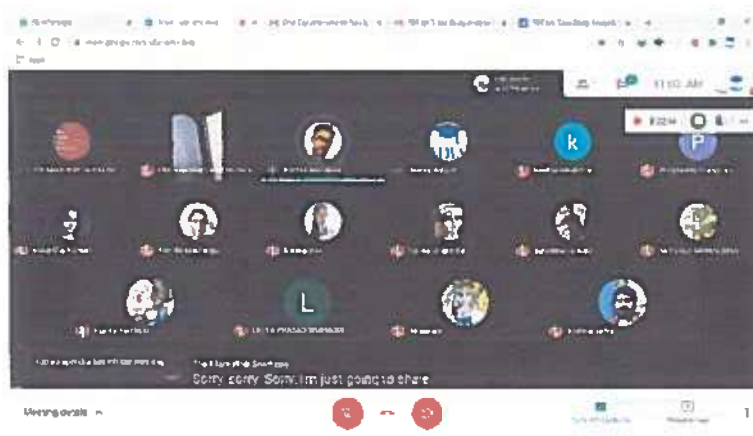

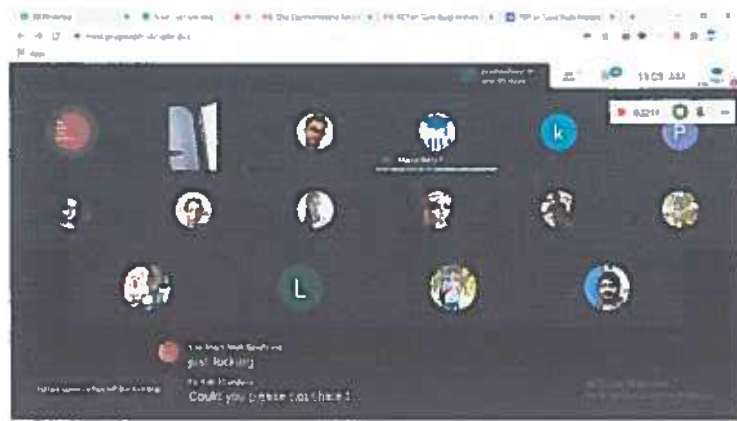

Profiting from digital business models is much more complex than companies frequently assume. Industrial companies often invest in digital technology without fully understanding the implications of digitalization.

They try to steer their businesses towards new digital business models, but the returns in terms of revenue enhancement are generally modest and sometimes negative. This phenomenon is often called the “digitalization paradox,” where manufacturing companies are unable to profit from their substantial investment in digital offerings.

This Sessions helps the students to know the key managerial challenge is to rein in the push to digital business model commercialization that arises from exorbitant customer requests and aggressive internal sales targets. Instead, companies must take the time to evaluate carefully the business impact and profit potential of new business model opportunities. Current literature and practice offer businesses few insights into how to do this accurately and significant gaps remain.

#### **Program Objectives**

- The main objective of this course is to make students comfortable with tools and techniques required in handling large amounts of datasets.
- They will also uncover various deep learning methods in NLP, Neural Networks etc.
- Several libraries and datasets publicly available will be used to illustrate the application of these algorithms.
- This will help students in developing skills required to gain experience of doing independent research and study.

#### **Course Outcomes:**

- In this course, students will learn the fundamentals of deep learning, and the main research activities in this field.
- Moreover, students will learn to implement, train, and validate their own neural network, and they will improve their understanding of the on-going research in computer vision and multimedia field.

To  
The principal  
Baba Institute of Technology and Sciences  
Visakhapatnam

Respected sir,

Sub: - Approval for conducting an add-on course – Req - Reg.

This is to bring to your kind notice that an add-on course titled "PYTHON" is scheduled to be conducted by Mr. S. Narasimha (Technical head of Zenith Consultancy) from Raghu Institute of Technology for two weeks i.e., feb-01-2021 to feb-11-2021. It provides students an opportunity to gain practical knowledge, experience and subject which will be very much helpful in their career prospects. Hence, we request you to approve and accord permission for the same.

### DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

---

#### Program Objectives:

- Master the fundamentals of writing Python scripts
- Learn core Python scripting elements such as variables and flow control structures
- Discover how to work with lists and sequence data
- Write Python functions to facilitate code reuse
- Use Python to read and write files
- Make their code robust by handling errors and exceptions properly
- Work with the Python standard library
- Explore Python's object-oriented features
- Search text using regular expressions

#### Course Outcomes:

At the end of the course, the student will be able to

1. Explain basic principles of Python programming language
2. Implement object oriented concepts
3. Implement database and GUI applications.
4. Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
5. Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

## **ADD ON COURSE ON ANSYS A PRACTICAL APPROACH**

**Date: 1<sup>st</sup>-6<sup>th</sup> Dec, 2021**

### **PROGRAMME OBJECTIVES**

ANSYS Simulation software works with a bias toward how to apply this tool in order to reap the most reward from its implementation which will provide students a practical perspective on the world of work. It provides students with an opportunity to learn practically through interaction, working methods and employment practices.

1. Understand the meaning and importance of ANSYS Software.
2. Get a basic knowledge of ANSYS Simulation software.
3. Learn how to solve complex structural engineering problems and make better, faster design decisions.
4. Identify how and where it would be used.
5. Students able to learn Simulation in 2-D & 3-D Models

### **RESOURCE PERSON**

**Dr. R. Rajeswara Reddy**

## Guest Invitation:

## DAY-1: Inaugural and Technical

### Session Objectives:

- ☐ Inaugural function held by the respective Dignitaries.
- ☐ Discuss an overview of ANSYS A Practical Approach, Applications various fields.
- ☐ Students will understand and learn basics of ANSYS Simulation

  
**PRINCIPAL**  
Baba Institute of Technology and Sciences  
Bakkannapalem A.O. Medhurthi

#### Outcomes:

- ☐ Student gain the knowledge about the ANSYS Simulation software, Applications in homevarious fields.
- ☐ Student can able to understand the software versions and its Functions.
- ☐ Student able to use the BLYNK App and IFTTT

#### DAY-2: Technical Session

#### Objectives:

- ☐ Discuss the topics of ANSYS I-Dimensional structural problems.
- ☐ Explain about how to draw 1-D Problems Beam elements.
- ☐ Student will learn how to model and functioning.
- ☐ Student will gain the practical knowledge about simulation software

#### Outcomes:

- ☐ Student gain the knowledge about ansys software and the tools which are used to draw the models
- ☐ Students learn how to draw models in 1-D Beams.
- ☐ Student gain the practical knowledge about ansys software by the end of the Session.

#### DAY-3: Technical Session

##### Objectives:

- ☐ Discuss the topics of introduction of 2-D Problems like symmetry and plane stress.
- ☐ Explain with basics of 2-D of Plate with hole.
- ☐ Student will gain the practical knowledge about how to draw models in 2-Dimensions using tools.

#### Outcomes:

- ☐ Student gain the knowledge about topics of introduction of 2-D Problems like symmetry and plane stress.
- ☐ Student learn the basics of 2-D of Plate with hole.
- ☐ Student gain the practical knowledge about models in 2-Dimensions using tools.

#### DAY-4: Technical Session

##### Objectives:

- ☐ Discuss the topics of 3-D Problems-Importing 3D CAD Models
- ☐ Explain about the 3-D Models and use of symmetry.
- ☐ Student will gain the practical knowledge about 3D CAD Models

  
PRINCIPAL

Baba Institute of Technology and Sciences  
Bakkannapalem (V), Madhurawade (P),  
Visakhapatnam

#### **Outcomes:**

- ☐ Student gain the knowledge about the topics of 3-D Problems-Importing 3D CAD Models
- ☐ Student learn about the 3-D Models and use of symmetry.
- ☐ Student gain the practical knowledge about 3D CAD Models.

#### **DAY-5: Technical Session**

#### **Objectives:**

- ☐ Discuss the topics of Curve fitting of Uniaxial Tensile testing.
- ☐ Explain about usage of data for Uniaxial Tensile test.
- ☐ Student will gain the practical knowledge about Uniaxial testing data.

#### Outcomes:

- ☐ Student gain the knowledge about the topics of Uniaxial Tensile testing data.
- ☐ Student learn about the usage of Uniaxial tensile tests.
- ☐ Student gain the practical knowledge about tensile tests.

#### DAY-6: Technical Session

#### Objectives:

- ☐ Discuss the topics of ansys software simulation of indentation.
- ☐ Explain about the simulation of contact mechanics
- ☐ Student will gain the practical knowledge about simulation
- ☐ Valedictory Program will be held for the respective dignitaries.

  
**PRINCIPAL**  
 Baba Institute of Technology and Sciences  
 Bakkannapalem (V), Madhurawada (P)  
 Visakhapatnam

### Outcomes:

- ☐ Student learn the importance of ansys simulation of indentation
- ☐ Student gain the knowledge about contact mechanics.
- ☐ Student gain the practical knowledge of simulation of indentation (contact mechanics).
- ☐ Valedictory Program had held for the respective dignitaries.

### Outcomes of an Event:

- ☐ ANSYS Simulation Software versions
- ☐ Usage of Tools for drawing 1-D, 2-D Problems
- ☐ Practical session on 3-D CAD Models
- ☐ Practical experience on uniaxial tensile testing data.
- ☐ Major outcome is students are able to work as a 'ANSYS programmer' in the industry because of the hands on practical sessions. This value added course will helps students to get the jobs in future.
