ADD-ON COURSE

ON

BLOCKCHAIN TECHNOLOGIES

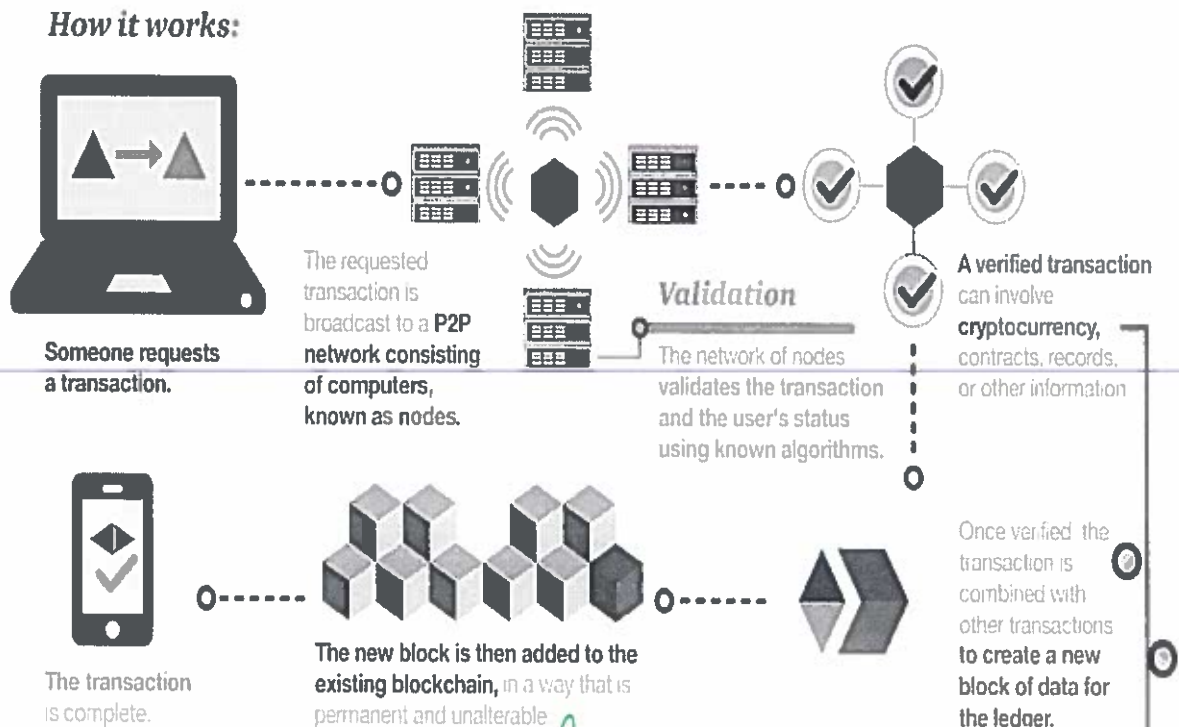

(SEP-17-2018 TO SEP-22-2018)

A look at *blockchain technology*

What is it?

The blockchain is a decentralized ledger of all transactions across a peer-to-peer network. Using this technology, participants can confirm transactions without the need for a central certifying authority. Potential applications include fund transfers, settling trades, voting, and many other uses.

How it works:

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Program Objectives

- Develop in depth understanding of the key technologies in data science and business analytics: data mining, machine learning, visualization techniques, predictive modeling, and statistics.
- Practice problem analysis and decision-making.
- Gain practical, hands-on experience with statistics programming languages and big data tools through coursework and applied research experiences.

Course Outcomes:

- Apply quantitative modeling and data analysis techniques to the solution of real world business problems, communicate findings, and effectively present results using data visualization techniques.
- Recognize and analyze ethical issues in business related to intellectual property, data security, integrity, and privacy.
- Apply ethical practices in everyday business activities and make well-reasoned ethical business and data management decisions.
- Demonstrate knowledge of statistical data analysis techniques utilized in business decision making.
- Apply principles of Data Science to the analysis of business problems.
- Use data mining software to solve real-world problems.
- Employ cutting edge tools and technologies to analyze Big Data.
- Apply algorithms to build machine intelligence.
- Demonstrate use of team work, leadership skills, decision making and organization theory.

Sub: -Approval for conducting a Value added course on SIXTH SENSE ROBOTICS-reg

This is to bring to your kind notice that the Department of Mechanical Engineering is planning to conduct a "One week value added course on SIXTH SENSE ROBOTICS" from 17-8-2018 to 23-8-2018, which will provide students a practical perspective on the world of work. It provides students with an opportunity to learn practically through interaction, working methods and employment practices. "

Hence we request you to accept our approval for conducting an event.

Forwarded for Approval.

ADD ON COURSE ON SIXTH SENSE ROBOTICS

Date: 17th - 23rd August, 2018

PROGRAMME OBJECTIVES

Sixth sense technology is a revolutionary technology that can change the physical world around us and make it more simpler. By using this technology the user can use natural hand gestures to control all the electronic devices in an innovative way. This course introduces you to the amazing world of sixth sense technology and its fascinating applications. Using an Arduino board and other electronic components, you will develop a robot that can be controlled through digital information. The digital information is processed using the image processing technique which takes the input data from the user who can give commands using hand gestures.

Apart from gaining practical skills on Sixth Sense technology, you will learn about the Arduino Architecture, Arduino Programming, Image Processing technology by doing this project based course.

- Understanding of the concepts of Sixth Sense Technology
- Practical sessions on Image Processing using Open CV
- Implementation of real time Image Processing techniques on Robotics
- Video Acquisition and Manipulation
- Understand Arduino Architecture and programming
- Develop and test an Sixth Sense Robot

DAY-1: Inaugural and Technical Session

Objectives:

- Inaugural function held by the respective Dignitaries.
- Discuss an overview of **Sixth Sense Technology** and applications in various fields.
- Students will understand the concepts of Sixth Sense Technology

Outcomes:

- Student gain the knowledge about the importance of **sixth sense technology** and applications in various fields.
- Student can able to understand the programs in sixth sense technology.
- Student able to use the open CV programming tool to operate the robot

DAY 2: Technical Session

Objectives:

- Understanding the practical knowledge of Image Processing using Open CV
- Practical sessions on Image Processing

Outcomes:

- Students are able to understand the practical knowledge of Image Processing using Open CV
- Students can understand the Practical sessions on Image Processing

DAY 3: Technical Session

Objectives:

- Understanding the Arduino Architecture and programming
- Practical session on Arduino Architecture and programming

Outcomes:

- Students are able to understand the Arduino Architecture and programming
- Students are able to practice the Arduino Architecture and programming

DAY 4: Technical Session

Objectives:

- Understanding the practical knowledge of Image Processing using Open CV
- Understand the Implementation of real time Image Processing techniques on Robotics

Outcomes:

- Students are able to understand the practical knowledge of Image Processing using Open CV
- Students able to understand the Implementation of real time Image Processing techniques on Robotics

Objectives:

- Understanding the development and testing of sixth sense robot

Outcomes:

- Students are able to understand the practical knowledge of Image Processing using Open CV
- Students can develop and test an Sixth Sense Robot

DAY 6: Technical Session

Objectives:

- Understanding the development and testing of sixth sense robot
- Valedictory Program will be held for the respective dignitaries

Outcomes of an Event:

- Understand the concepts of Sixth Sense Technology and its applications.
- Practical sessions on Image Processing using Open CV
- Understand Arduino Architecture and programming
- Students can develop and test an Sixth Sense Robot by understanding Arduino Architecture and programming
- Major outcome is students are able to perform hands on experience on humanoid robots and identifying different operations in real time applications. This value added course will helps students to get the jobs future.

Topics discussed in the meeting:

VALUE ADDED COURSE: The ECE Department is going to conduct a value added course for 30 hours duration for second, third and final year students on "Sci Lab – A Numerical computing System" from 20-08-2018 to 24-08-2018.

- **Allocation of the co-coordinator:** Mr. K. PRADEEP is appointed as an event coordinator.
- **Resource person:** M. Murali professor, is identified as Resource Person from Centurion University for this one week program.
- **Distribution of the event works:** The event works are distributed to all the faculty members to conduct this event in a smooth way.

ABOUT COURSE

- Numerical computing is an approach for solving complex mathematical problems using only simple arithmetic operations.
- The approach involves formulation of mathematical models physical situations that can be solved with arithmetic operations.
- It requires development, analysis and use of algorithms. Numerical computations invariably involve a large number of arithmetic calculations and, therefore, require fast and efficient computing devices.
- The microelectronic revolution and the subsequent development of high, low cost personal computers have had a profound impact on the application of numerical computing methods to solve scientific problems.
- Numerical Computation Lecture focusing on understanding the fundamental mathematical concepts and mastering problem-solving skills using numerical methods is an important lecture in colleges whose knowledge are hard to understand and master for most students.
- Scilab, famous open-source scientific computation software, can be used to test algorithms or to perform numerical computations.
- Scilab also provides many numerical methods and is very easy to use even for people without prior programming experience.

PROGRAM REPORT

COURSE CONTENT

SCILAB is an open-source software for numerical mathematics and scientific visualization. It is capable of interactive calculations as well as automation of computations through programming.

It provides all basic operations on matrices through built-in functions so that the trouble of developing and testing code for basic operations are completely avoided. Its ability to plot 2D and 3D graphs helps in visualizing the data we work with.

All these make SCILAB an excellent tool for teaching, especially those subjects that involve matrix operations. Further, the numerous toolboxes that are available for various specialized applications make it an important tool for research.

ORGANIZED BY ELECTRONICS AND COMMUNICATION ENGINEERING

Objective of an Event:

- Understand the significance of SCILAB programming.
- To analyze knowledge of physics and mathematics is transformed into a computer Programming.
- To provide a powerful computing environment for engineering and scientific applications, this includes hundreds of mathematical functions.
- To introduce basic concepts of scientific programming using SCILAB.
- It has a high-level programming language allowing access to advanced data structures, 2-D and 3-D graphical functions

Description of the Event:

DAY-1: Inaugural and Technical Session

Objectives:

- Inaugural function held by the respective Dignitaries.
- An overview on what is meant by SCILAB and what is it needed.
- Discussion about its workspace and its Working directory
- Content about creating matrices and some simple matrix operations

Outcomes:

- Student gain the knowledge about the overview SCILAB and its environment.
- Student were able to know about the workspace and its Working directory of SCILAB
- Student able to get a brief discussion about linear algebra and sparse matrices
- Students were able to create matrices with some matrix operations

DAY-2: Technical Session

Objectives:

- Discuss the creation of sub matrices and Statistics
- An overview on how to work with polynomials
- Discuss about plotting graphs using SCILAB.
- Student will learn how to graphs using SCILAB in practical session.

Outcomes:

- Student gain the knowledge about creation of sub matrices and Statistics using scilab.
- Student understand how to work with polynomials with scilab.
- Student learn how to plot graphs using scilab.

DAY-3: Technical Session

Objectives:

- To learn how to plot 3D graphs
- To be able to learn scilab programming language
- To be able to know about script files and functional files

Outcomes:

- Students got to know about the 3D graph plotting is done.
- Students got to know that three dimensional plots of surfaces can be plotted with the plot3d() family of functions
- Student were able to write programs in scilab
- Student learnt about script files and functional files

DAY-4: Technical Session

Objectives:

- Discuss about function in scilab.
- Student will learn the functions as well as file operations in scilab.
- Student will gain the knowledge of polynomial curve fitting.
- Students will gain knowledge of reading Microsoft excel files using scilab

Outcomes:

- Student gain the knowledge about function in scilab
- Student learn about the functions as well as file operations in scilab.
- Student got to know about polynomial curve fitting.
- Student gain the knowledge about reading Microsoft excel files using scilab

DAY-5: Technical Session

Objectives:

- Discuss about the miscellaneous commands in scilab
- Student will know about the overview of data structures
- Students will know about the directed graphs and principal stresses in scilab
- Valedictory Program will be held for the respective dignitaries.

Outcomes:

- Student learn the the miscellaneous commands in scilab
- Student gain the knowledge about data structures.
- Student can able to know about the directed graphs and principal stresses in scilab.
- Valedictory Program had held for the respective dignitaries.

Outcomes of an Event:

- Analyze Scilab environment and programming language.
- Students will be able to Use decision making control statements like if , if else and loops (for, while) to develop programs.
- Students will be able to Use data structures like list, struct and cell arrays available in scilab to manage and work with data .
- Students will be able to use 2D, 3D graphical functions to display and analyze data.
- To understand about operations on figures and axes.
- To Plot finite element analysis results in 2d or 3d

DEPARTMENT PROFILE:

The Department of Electrical & Electronics Engineering was established in the year 2008 with an intake of 60 students and subsequently an enhancement upto 72 through lateral entry scheme in the year 2009. The department received ISO: 9001 – 2000 certification and accredited by National Assessment and Accreditation Council of India (NAAC), National Assessment and Accreditation Council (NAAC). The department has made significant growth in terms of infrastructural and academic standards on par with other premier institutions in Andhra Pradesh.

ABOUT THE ADD ONCOURSE PROGRAM

The main objective of PLC & SCADA workshop is to make aspiring engineers acquainted with the conceptual and practical knowledge of the industrial automation and latest technologies being used to achieve industrial automation. The idea of organizing this workshop is to inculcate the basic fundamental of automation in the students and provide them with a platform to work on, in the near future.

COURSE CONTENT

An overview of PLC SCADA, PLC Fundamentals, selection of PLC components, types of inputs and outputs, wiring of input and output devices, introduction to field device, SCADA system application, data entry, communication with PLC.

SCADA is a central system used to monitor and run plant processes. SCADA systems are often used in conjunction With PLC's and other devices. Data from PLC's and Remote terminal units are related to the system.

The workshop will give platform to understand what is SCADA and the relation between SCADA and PLC's

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

ONE WEEK VALUE ADDED COURSE ON PLC-SCADA

Date: 3rd - 08th December, 2018

ORGANIZED BY ELECTRICAL AND ELECTRONICS ENGINEERING

Objective of an Event:

- Understand the definition and significance of the Programmable logic controller.
- Discuss the generic architecture and constituent components of a PLC.
- The need for industrial electronic circuits in the controlled applications.
- Understand the definition of SCADA its background and features.
- Discuss the Architecture of SCADA and introduction to SCADA hardware and software
- Interfacing PLC and SCADA, applications of SCADA
- Students will be able to make the Comparison of PLC and SCADA.

Description of the Event:

SCADA is a central system used to monitor and run plant processes. It's typically software installed on computer and one of its major functions is to act as an interface with industrial machines (human machine interface). SCADA systems are often used in conjunction with PLC's and other devices. Data from PLC's and remote terminal units are relayed to the system and commands are entered into the HMI to make adjustments to the processes they control.

Used together SCADA software and PLC's form an automatic system for prescribing maintenance tasks, forming the core of a predictive maintenance program.

Objectives:

- Inaugural function held by the respective Dignitaries.
- Discuss an overview of PLCs and SCADA, fundamentals, Applications
- Discussion about Selection of PLC components, I/O list selection, Architecture Evolution of PLC
- Concept of wiring input and output devices

Outcomes:

- Student gain the knowledge about the overview of PLCs and SCADA, fundamentals, Applications
- Student were able to identify Selection of PLC components, I/O list selection.

Objectives:

- Discuss the concepts of flags and scan cycle execution
- To be able to connect field devices to PLC's I/Os
- Discuss about Programming Instructions Arithmetic and logical operations.
- Student will Learn the move block application, timer and counter blocks programming.
- Student will learn the advanced instructions.

Outcomes:

- Student gain the knowledge about the concepts of flags and scan execution.
- Student learn about the connections of field devices to PLCs I/Os
- Student learn how to write code in Programming Instructions Arithmetic and logical operations.
- Student learn about the move block application, timer and counter blocks programming.

Objectives:

- To know about Monitoring Arrays & tags of user-defined data arrays
- To be able to edit ladder logic online
- To be able to troubleshoot controller problems
- To be able to monitor GSV/ SSV Instructions

Outcomes:

- Students got to know about the monitoring arrays & tags used defines data arrays
- Student were able to edit ladder logic online
- Student learnt about the troubleshooting in controller problems
- Student learn how to troubleshoot I/O module problems.
- Student leant about Fault detection and error handling in PLCs

DAY-4: Technical Session

Objectives:

- Discuss about SCADA applications and Calculating SCADA tag.
- Student will learn the selection of software basis of SCADA tag.
- Student will gain the knowledge about SCADA screen /creating & editing graphics display with animation.
- Students got to know about the data entry and stop commands, creating and accessing real time functions

Outcomes:

- Student gain the knowledge about the about SCADA applications and Calculating SCADA tag
- Student learn about the selection of software basis of SCADA tag.
- Student learn the knowledge about SCADA screen /creating & editing graphics display with animation.
- Student gain the knowledge about the data entry and stop commands, creating and accessing real time functions.

DAY-5: Technical Session

Objectives:

- Student will know the importance of team building and the several strategies for focusing on Career
- Student will know how to Implement Real Time Projects using PLC-SCADA
- Student will be able to do Troubleshooting the application, fault diagnostics and error handling.
- Valedictory Program will be held for the respective dignitaries.

Outcomes:

- Student learn the importance of team building and the several strategies for focusing on Career
- Student gain the knowledge about how to Implement Real Time Projects using PLC-SCADA
- Student can be able to do Troubleshooting the application, fault diagnostics and error handling.
- Valedictory Program had held for the respective dignitaries.

Outcomes of an Event:

- Analyze the concept of automation, need & history of automation, basics of PLC introduction to PLC .
- Classify input and output interfacing devices with PLC
- Students will be able to apply the knowledge gained about PLCs and SCADA systems to real-life industrial applications
- Students will be able to interfacing PLC and SCADA, applications of SCADA

DAY-6: Technical Session and Doubts clarification

Objectives:

- Student will wave off any doubts or complexities in mind.
- Student will know the applications of PLC-SCADA in industry 4.0

Outcomes of an Event:

To interpret and acquire knowledge of PLC and SCADA in real time applications and be industry ready.

ADDON COURSE ON PLC-SCADA

ORGANISED BY

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

COURSE OBJECTIVES:

1. To understand the generic architecture and constituent components of a Programmable logic controller
2. To develop a software program using modern engineering tools and technique for PLC and SCADA
3. To apply the knowledge gained about PLCs and SCADA systems to real-life industrial applications

COURSE OUTCOMES:

1. Analyze the concept of automation, need & history of automation, basics of PLC introduction to PLC's.
2. Classify input and output interfacing devices with PLC
3. Students will be able to apply the knowledge gained about PLCs and SCADA systems to real-life industrial applications
