To
The Principal,
Baba Institute of Technology and Sciences Visakhapatnam

From
HOD
Department of Computer Science and Engineering

Sub: -Approval for conducting workshop on A DAY WITH C

This is to bring to your kind notice that the Department of Computer Science and Engineering is planning to conduct a Seminar on A Day With C on 9th SEP 2019which will provide students benefits on programming. In this connection we need aseminar hall.

Hence we request you to accept our approval for conducting a seminar.

Thanking you

Yours Sincerely

HOD-CSE

REPORT

C is a programming language that is both versatile and popular, allowing it to be used in a vast array of applications and technologies. Its simplicity and flexibility are largely because it can function independently of machines, which has lent itself to becoming one of the foundational programming languages in the industry.

Description:

- By learning C. you will be able to understand and visualize the inner workings of computer systems (like allocation and memory management), their architecture and the overall concepts that drive programming.
- It is easy to learn the basics of C, but you will have to be an expert in order to build a successful career in C programming.
- C programming is extensive and primarily used for developing various kinds of operating systems and network drivers.
- It also finds applications in developing other programming languages.
- Due to such varied applications, C provides a lot of opportunities for building a successful, programming career.
- The department of CSE organized event A DAY WITH C on 09/09/2019 on the occasion of Dennis Ritchie birth anniversary. The objective of this seminar is to make students to understand the concept of C programming.
- Prof.N.B.venkateswrlu explained the concepts related to C programming and its importance which helped the students to gain knowledge on those concepts.

OBJECTIVES:

1. Students learn how to program with basic language
2. Gaining knowledge over programming
3. The job opportunities in software fields

OUTCOMES:

1. The main outcome for this seminar is awareness on C language
2. The career opportunities based on software
3. The speakers spoke about different career options in programming language and he also said ld know the basic and evergreen language C

Subject: Confirmation Letter for conducting workshop / Training

Dear Sir,

This letter is to confirm that we want to make our College **BABA INSTITUTE OF TECHNOLOGY AND SCIENCES (Department of Mechanical Engineering)** as an Innovation Center for the event industrial workshop/ training program 2019.
Please fill the columns for date and mark the type of workshop which College wants to conduct.

Workshop Type (Topic) :	*Go-kart Dynamics & Designing with Practical Session*
Consecutive Dates:	21st and 22nd August 2019
Fee per participant:	400

We are ready to provide facilities which are mentioned in the proposal are:-
Lecture hall, Computer lab, Projector, writing board.

Coordinators to assist the entire event their name and contact details are following:-

S. No	Name of the Coordinators	Contact no	Email id
1	(Faculty Coordinator) -Sk.Hyderali	9030308187	hyderali.mech@gmail.com
2	(Student Coordinator)- T.Siva	7036126235	shivaraju12358@gmail.com
3	(Student Coordinator)- K.Lakshmi saranya	9573035289	harisara.kls@gmail.com

We hope for the successful execution of workshop.

Thanks and Regards

Dr.C.V.GOPINATH 27/7/19
Principal

MINUTES OF MEETING

BITS/MECH/25/2018-19/1

Minutes of Meeting held in Department of Mechanical Engineering on 02-07-2018 at 04.00 P.M.

Topics discussed in the meeting:

- **Work shop Event:** The Mechanical Department is going to conduct Two Day Workshop on "GO-KART Design & Hands on Practical" on 20th and 21st August 2019 for third and final year students.
- **Convener :** A.S. Bhanu Prasanna is appointed as an Event Convener.
- **Co-Convener :** Ch. Venkat Rao is appointed as an event Co-Convener
- **Allocation of the co-coordinator:** SK. Hyderali and N. Govind joy are appointed as an event coordinators.
- **Resource persons :** Shri P.V.V.P.Harihara Rao, Deputy Chief Mechanical Engineer Visakhapatnam Port Trust, Visakhapatnam identified as Chief Guest of Inauguration on 20th Aug, 2019.
  Shri K.A. Krishna Sastry, Sr Section Engineer (Mechanical and Electrical), South Eastern Railways, Visakhapatnam identified as Guest of Honor of Inauguration on 20th Aug, 2019.
  Shri Rahul Ranjan, CEO, AMK Industry, Jaipur, Rajasthan identified as Speaker.
- **Distribution the event works:** The workshop works are distributed to all the faculty members to conduct this event in a smooth way.

GO-KART Event in MECHMERIZE 2K19

PRINCIPAL
Baba Institute of Technology and Sciences
Bakkannapalem (V), Madh
Visakhap

EVENT REPORT:

The go-kart is a vehicle that is small, quick, light, and simple to drive. Since the go-kart is designed for flat-track racing, it has a very poor ground clearance relative to most cars, but it does not have suspension. Engine, steering, suspension, tires, and bumpers are the elements of a go-kart.

A goengine kart is either a two-stroke or a four-stroke engine. The word "eco-kart" refers to a car that uses electric motors instead of an engine. Go-karting is a form of open-wheel motorsport that involves lightweight, open-wheeled vehicles with four wheels. To feel the excitement, the chassis is independent of the suspension. Because of its ease, low cost, and safer way of racing, go-karting is a perfect outlet for those involved in racing. It is possible to have an indoor or outdoor track. The go-kart tracks are much smoother than the F1 tracks.

Go-karting experience will better introduce the driver to the actual racing environment, allowing them to participate as professional motor racer in various competitions. This project is intended to design and fabricate a low-weight go-kart. To reduce the weight of this vehicle, the main effort in this project is to select material. Hence, by choosing an appropriate material for its fabrication, one can reduce the overall weight of this vehicle.

Project objectives

Following are the main objectives of this project:

1. Selection of a suitable material for designing.
2. Designing of Go-Kart on software.
3. Analysis of Vehicle on an analysis software
4. Fabrication of Go-Kart

EVENT OUTCOMES

- This Event aimed to build a go-kart based on a conceptual design that was optimized to improve the vehicle's stability.
- The Go-design kart's and fabrication focuses on creating a simple, lightweight, and easyto-operate vehicle.
- The design specifications included ergonomics, safety, and reliability considerations.
- All major components were analyzed to improve vehicle performance, improve strength and rigidity, and reduce complexity and manufacturing costs.
- The Go-kart design has been as per usual calculations of go-kart, but to reduce the weight of this vehicle, we used the option of choosing lighter material of 304 grade of stainless steel.
- Moreover, the engine used in this project is 110 cc that is light enough to design a light-weighted vehicle.

FDP ON "LEARN & TEACH ENGINEERING GRAPHICS THROUGH SOLID MODELING"

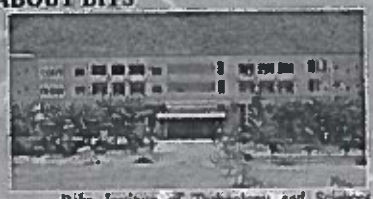
22nd Aug 2019

Organized by
Department of Mechanical Engineering

Baba Institute of Technology and Sciences
(Approved by AICTE and Affiliated to JNTUK Accreted by NAAC)
Website: www.bitsvizag.com

PRINCIPAL
BABA INSTITUTE OF TECHNOLOGY AND SCIENCES
BAKKANNAPALEM (V), P.M. PALEM,
MADHURAWADA
VISAKHAPATNAM - 530 048

ABOUT BITS



Baba Institute of Technology and Sciences (BITS) is located in a sprawling campus area of 15 acres, in P.M.Palem, Madhurawada about 1KM from NH-5 it uniquely and dearly situated at the foot of a long and thick greenish mountainous belt imposing a fillock on western and southern sides overseeing the building complex.

The cool breeze perennially blowing from the picturesque mountains marvelously motivates and inspires the young minds to learn & acquire the knowledge and skills to get recognition and excel for in the fields of Technology, Science and Management.

ABOUT THE DEPARTMENT

It was established in the year of 2010 with an intent of raising highly qualified engineers and researchers who can make substantial contribution to the field of Mechanical engineering. The department has strength of students gifted by term of devoted and diligent staff members.

Under Graduate and post graduate programs are offered by the department. The department has well equipped laboratories such as CAD /CAM, industrial robotics, geometric modeling, special manufacturing process & digital IC and mechanical laboratories

ABOUT VIZAG

Visakhapatnam also known Vizag and Waltair is the largest city and the financial capital of the Andhra Pradesh The city is the administrative headquarters of Visakhapatnam district and state headquarters of Indian Coast Guard. Its geographical location is amidst the Eastern Ghats and the coast of the Bay of Bengal.

Visakhapatnam is a major tourist destination and is particularly known for its beaches. It is referred to by many nicknames such as The City of Destiny and The Jewel of the East Coast.

OBJECTIVE

To share the overall concept of **Learn & Teach Engineering Graphics through Solid Modeling.**

In order to keep the faculty members abreast of the technological changes, it has been planned to organize a one day faculty development programme.

during FDP to gain hands-on experience.

COURSE STRUCTURE & BENEFITS

- Introduction to Engg. Graphics
- Basics of Solid Modeling
- Use of sketching
- Use of Feature Modeling
- Use of Drawing in Solid Works
- Use of drawing solving EG problems
- Use of Features in solving EG problems
- Creating Animations for the EG subject
- Creation of AVI video for the EG subject

WHO SHOULD ATTEND?

The one day FDP aims at providing the necessary background and training in theoretical and practical learning of Solid Works, a solid modeling software, to develop subject content of the Engineering Graphics subject that is the language of Engineers.

Rs.5000/- worth of Contents, Software Tools & Kits for this subject will be given to all the participants at free of cost.

INFORMATION TO APPLICANTS

This FDP is open for all faculties of Engineering Colleges and Polytechnics which is approved by AICTE.

The Registration fee is Rs.500/-. The fee includes course material, lunch and refreshment.

REPORT 24th August 2019

In this workshop Dr.M.SENTHIL KUMAR speaks about the primary goal of SOLIDWORKS and Engineering Graphics: An Integrated Approach is to introduce the aspects of Engineering Graphics with the use of modern Computer Aided Design package – SOLIDWORKS. This course is intended to be used as a training guide for students and professionals.

Engineering graphics is not in itself a very interesting subject to learn. There is a large amount of precise ISO and ANSI standards, amongst others, which must be followed in order to complete technical drawings. To stimulate student interest in purposeful learning and balance this with the courses' learning outcomes, the following elements were introduced into the teaching/learning process: assignments aligned according to Bloom's taxonomy; creative elements in assignments; continuous and formative assessment;

He explained about the purpose of Engineering Graphics and Design is to clear and accurately capture all geometric features of products and components.

Solidworks is a 3d modeling and drafting software. This is used mainly by mechanical engineers. As to your question, yes, it can be learned. But the entire purpose of working in solidworks will be clear only if you know engineering. You can master the basic portions all by yourself without engineering knowledge. But aspects like sheet metal operation stress- stain analysis, drafting, assembly etc. need a sound knowledge in mechanical engineering.

Outcome

- The workshop utilized for better understandings of engineering graphics
- Faculty got to know about information regarding acceptable variations ,load limits ,materials
- Faculty are able to understand the description of surface roughness

Dear Sir/Madam
BITS Vizag Organising International FDP on **"Deep Learning Algorithms for Computer Vision A**
on 26th Sept 2020, Saturday 10:00 AM to 05:00 PM

TOPICS to be covered:

- Role of Machine Learning & Deep Learning in Biometric Authentication.
- Image Quality Assessment (IQA) and Metrics for IQA
- Application of Deep Learning Algorithms for Cloud Robotics.
- Giving Visual Interpretation to Machines-CNN

Last Date for Registration: 24th September 2020.
₹100/- (Indian) GPay or PhonePe to 9440081282
$5 (₹350/-) (Global)
"Link for Registration:"
https://surveyheart.com/form/5f64b0b01a7950567c4f6e1c

E-Certificate will be issued on successful completion of the IFDP.

Dear Participants,

Greetings from BITS Vizag , IFDP- 2020.

Congratulations! You have successfully registered.

The best thing you can do now is to bookmark the IFDP link and set a reminder on your calendar so you do not miss the program.

Session -I Topics to be covered, Time at 10:00AM

- Role of Machine Learning & Deep Learning in Biometric Authentication.
- Image Quality Assessment

Link: https://zoom.us/j/98638783608?pwd=T2pWNmprUEhYa1FOT1QwQ05EMEZIQT09

Session -II Topics to be covered, Time at 1:30 PM

- Application of Deep Learning Algorithms for Cloud Robotics.
- Giving Visual Interpretation to Machines-CNN

Link: https://zoom.us/j/98638783608?pwd=T2pWNmprUEhYa1FOT1QwQ05EMEZIQT09

Please find the attachment below for program scheduled details.

Thanking You,

With best regards,

Prof. B.Siva Prasad
Head - ECE, BITS Vizag

A Webinar Report on Deep Learning Algorithms for Computer VisionApplications – An Industry Perspective

The speaker spoke about artificial intelligence that is a field of computer science that makes a computer system that can mimic human intelligence. It is comprised of two words "Artificial" and "intelligence", which means "a human-made thinking power." The Artificial intelligence system does not require to be pre-programmed, instead ofthat, they use such algorithms which can work with their own intelligence. It involves machine learning algorithms such as reinforcement learning algorithms and deep learning neural networks. On the other hand, Machine learning enables a computer system to make predictions or take some decisions using historical data without being explicitly programmed. Machine learning uses a massive amount of structured and semi-structured data so that a machine learning model can generate accurate results or givepredictions based on that data. Machine learning works on an algorithm that learns on its own using historical data. It works only for specific domains such as if we are creating a machine learning model to detect pictures of dogs, it will only give results for dog images, but if we provide new data like cat image then it will become unresponsive. Machine learning is being used in various places such as for online recommender systems, Google search algorithms, Email spam filters, Facebook Auto friend tagging suggestions, etc

Deep learning is an emerging area of machine learning (ML) research. It comprises multiple hidden layers of artificial neural networks. The deep learning methodology applies nonlinear transformations and model abstractions of high level in large databases. The recent advancements in deep learning architec-tures within numerous fields have already provided significant contributions in artificial intelligence.

The second speaker Prof. P. V. V. Kishore spoke about automatic recognition of individuals based on their anatomical (e.g., face, fingerprint, iris, retina) andbehavioral (e.g., signature, posture) individualities is called Biometrics. It is a form of information that helps in identifying one's physical characters such as psychosomatic, behavioral characters, etc. Every human being is different from one another regarding physical and behavioral characteristics. We can analyze one's attribute with the help of these characteristics. The physical traits such as fingerprints, the color of the iris, the color of hair, hand geometry, and behavioral features such as voice and accent of tongue, signature, grid, or the way of striking keys of the computer keyboard, etc., makes a person stand out from the rest.
A biometric system is the latest technology which helps in recognizing a user's physiological, behavioral or both characters as input, verifies it, and identifies the individual as a unique user.

PRINCIPAL
Baba Institute of Technology and Sciences
Sakkannapalem (V), Madhurawada (P)
Visakhapatnam

The third speaker Dr. K. Chiranjeevi spoke about How AI Can Improve Biometric Authentication Systems when it comes to security, improving accuracy and efficiency of biometric authentication systems cannot always be done with human programming. Artificial intelligence and machine learning can help us make our systems more secure and efficient. Biometric technologies can be split into two domains, physical and behavioral.

Physical biometrics are objective characteristics of a person like their face or fingerprints, DNA, and more. This must be converted into data that can be analyzed by the AI system and compared against a database for authentication purposes. One of the cases where AI and ML prove most helpful is with facial recognition. Used extensively with augmented reality solutions, AI can help make facial recognition by computers much easier by analyzing facial features and matching them with a database. One of the most interesting trends that artificial intelligence makes possible is behavioral biometric technology. This uses unique behavioral characteristics of how they interact with the world, things that the user may not even realize about themselves. This is one of the most effective lines of defense against deep fake fraud attempts. Some of the more popular ways to measure behavioral biometrics are:

- Mouse activity
- Keystroke movement
- Touch screen press size, area, and pressure
- Mobile device motion

Webinar Deep Learning Algorithms for Computer Vision Applications

Organized

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

Webinar Outcomes

At the end of this webinar, they will be able to

- Apply the basic principles, models, and algorithms of AI to recognize, model, and solve problems in the analysis and design of information systems.
- Analyze the structures and algorithms of a selection of techniques related to searching, reasoning, machine learning, and language processing.
- They will improve their understanding of the on-going research in computer vision and multimedia field.
- At the end speaker gave information on how it will be helped to carry the topics learnt there going forward.

EVENT REPORT - OUTCOMES

Prof. Chandra Mouli explained about the process of obtaining best results under given circumstances and specifications. The conditions that give either maximum or minimum (optimum) value of a function are obtained from optimization. Many functions (also called objectives) in nature can be defined in terms of certain affecting variables. Variables or design parameters usually have lower and upper boundaries. In addition to these variable bounds, some constraint functions in terms of variables are also formulated. In computer aided design (CAD) for example, after the finite element analysis, the variables are modified further till a reasonable solution from analysis is obtained. So, engineering analysis and optimization is one of the single steps in CAD. The variables or design parameters satisfying the constraints (feasible solutions) are only eligible for finding the maximum or minimum value of the function. So called, constrained optimization problems are the general form of problems with multiple variables.

OUTCOMES OF THIS EVENT

Present lecture deals with some details of above techniques especially Box method and exterior penalty approaches along with few application examples.

Today, multi-objective optimization problems are quite often seen in various industrial problems. Here, no solution exists that minimizes all the objectives simultaneously. Hence, the concept of Pareto optimum solutions used. A feasible solution X is Pareto optimal if there is no other feasible solution Y that would reduce some objective function f_1 without causing a simultaneous increase in at least one other objective function f_2, f_3,... Several techniques are developed for solving multi-objective optimization problems. Examples: global criterion method, utility function methods, lexicographic method, goal programming method etc. Multiple or Pareto font is obtained often with evolutionary optimization techniques like

(i) Nondominated sorting genetic algorithm II (*NSGA-II*)

(ii) Multiobjective feasibility-enhanced PSO (MOFEPSO) etc.
